

## MATRIX DKS

### ROCKWELL C-A-D-B-F-G-N-T-HBT

- Beyond the regular dimension
- Fully motorized vertical head movement from 0 to 700 mm
- Depth capacity 170 mm
- Rotating turret 2000 mm diameter 360°
- Automatic start contact with test piece and test cycle.
- With a single start input the hardness tester moves to make contact to the surface and to start the cycle
- In case of test piece deflection, the head follows the surface for a perfect result even at first test
- Suitable to test power for aerospace engine

## AUTO PRS

Automatic in-line testing system for SKF bearing test.  
HRC scale, automatic loader, automatic test, automatic sorter:  
GO - high - low.  
1000 pcs per hour.

Option: light signal for fast selection go-no go

## AUTO GM

Automatic system for high speed test for car components "steering pars" to G.M. On Rockwell C Scale, automatic loader, automatic test, automatic sorter: GO - high - low.  
1500 pcs per hour.

## AUTOMATIC BOLTS

Automatic high speed hardness tester for nuts, bolts, Rockwell C scale, automatic loader, automatic test, automatic sorter: GO - high - low.  
1000 pcs per hour.
